THE PLASTIC SURGERY RESEARCH COUNCIL

53RD ANNUAL MEETING

May 28-31, 2008
Southern Illinois University • Springfield, Illinois

Registration Brochure
The Plastic Surgery Research Council is proud to be in Springfield, Illinois for the 53rd Annual Meeting. Once again, the abstracts presented at the meeting are available to all members of the ASPS and readers of Plastic and Reconstructive Surgery through the dedicated, supplemental issue of the journal. The Program Committee, led by the Program Chair, Peter Rubin, has worked diligently to select a broad spectrum of research for presentation. This year, the PSRC meeting presents a new and enthusiastic marriage of both basic science and clinical research. Outcome studies of our clinical practice should be embraced so that all aspects of research are offered to our membership and sister societies. A panel of clinical research scientists will kick off the outcomes section focusing on future opportunities available to us all.

The PSRC scientific program continues to encompass diverse areas of research that include tissue engineering, stem cells, bioengineering, nerve regeneration, ischemia/reperfusion, muscle and tendon physiology, gene therapy, wound healing, fetal surgery, craniofacial surgery, and composite tissue allotransplantation. Dr. Peter Taub has orchestrated another panel of leading experts in the field of Composite Tissue Allotransplantation to illustrate current advances and visions in this arena of research. The research presented continues to be of the highest quality. The combination of exciting speakers, panels, and scientific paper presentations shall truly make this 53rd Annual PSRC Meeting a memorable experience.

**Area Attractions**

**ABRAHAM LINCOLN PRESIDENTIAL LIBRARY AND MUSEUM**
The new state-of-the-art Abraham Lincoln Presidential Library and Museum was carefully designed with exacting historical detail to encourage an “experience” for all visitors. Amazingly well-preserved artifacts tell the entire life story of our nation’s 16th President. Through the years, Springfield has changed in many ways, but the spirit of our greatest citizen remains intact.

**ILLINOIS KOREAN WAR MEMORIAL**
Octagon granite walls provide the foundation for this breathtaking monument. The names of 1,752 Illinois veterans killed in action are engraved on the granite walls as well as quotes from all of the branches of the Armed Forces. Surrounded by 300 Rose of Sharon Bushes, this memorial is located in Oak Ridge Cemetery near the Lincoln Tomb.

**LINCOLN TOMB**
This beautiful monument marks the final resting place of Abraham, Mary Todd, Tad, Eddie and Willie Lincoln. (Oldest son, Robert, is buried in Arlington National Cemetery.) Abraham Lincoln was buried in Springfield’s Oak Ridge Cemetery at the request of Mrs. Lincoln after his assassination in 1865. The monument was designed by sculptor Larkin Mead, completed in 1874, and paid for with public donations. The original receiving vault in which Abraham Lincoln was buried can be seen on a tour of the cemetery.

**DANA THOMAS HOUSE**
It was 1902 in Victorian Springfield when local socialite and activist, Susan Lawrence Dana, hired a rising young architect from Chicago to remodel her family home. What resulted and remains today is one of Frank Lloyd Wright’s finest prairie-style homes, complete with original furniture, art glass doors, windows and light fixtures. The rich history and architectural significance of this elaborately restored residence will add an unforgettable dimension to your tour of historic Springfield. Last tour begins at 3:50pm.

**LINCOLN MEMORIAL GARDEN AND NATURE CENTER**
A woodland and prairie garden with over five miles of trails lead you on a journey through the Illinois landscape Lincoln would have known. Depending on the season you visit, you could discover springtime dogwoods in full bloom, colorful prairie wildflowers of summer, burnished autumn leaves, or snow-covered maple trees bursting with sap. Located on the shores of Lake Springfield, the garden was designed by landscape architect, Jens Jensen. Be sure to visit the Garden's Nature Center and Split Rail Gift Shop.
**Objectives**

Participants attending this meeting will:

- Learn about the most current scientific research in fields allied to plastic surgery.
- Identify new research methods and results that are most likely to improve the practice of plastic surgery.
- Contribute to open discussion and critique of presented information.
- Encourage and support student, resident, and fellow participation in research and in the annual meeting.
